For immediate release.

Achilles Link Up approval enables Luminite to supply PIR detectors to the UK's rail industry.

Luminite has achieved Achilles Link Up approval status, allowing the company to supply its Genesis wireless PIR detector systems to the UK's rail industry.

Achilles is an independent, specialist organization providing supplier pre-qualification, evaluation and monitoring audit services. It is recognised by professional buyers in many of the world's largest companies, across a wide variety of industrial markets. The Achilles Link Up programme is a supplier pre-qualification audit designed specifically for the UK rail industry and endorsed by Network Rail. It is referenced by the buyers responsible for rail infrastructure procurement, whilst ensuring compliance with current railway legislation. Achilles Link-up is governed by the Rail Industry Supplier Qualification Scheme (RISQS), the rail industry's own supplier audit board.

Graham Creek, managing director of the UK-based PIR manufacturer Luminite, explains the significance of the approval. "Achilles Link Up status demonstrates that Luminite is a high quality and reliable supplier, meeting the demanding requirements of the rail industry. The Link Up programme drives high performance and continuous

improvement amongst supplier members. It is trusted and respected by purchasing organisations the world over, reducing the need for member companies to do their own supplier verification audits. The approval results are shared with all buyer members in the Achilles Link-up group, increasing Luminite's profile in the rail industry.

"Theft of materials from railways and trespassing are on the increase, with potentially catastrophic results for individuals and the rail service. Our Genesis wireless PIRs are ideal for detecting people on railway lines, at any time of day or night. Battery powered operation makes the PIRs especially suitable for use in remote locations, rapid deployment applications and on sections of track which are difficult to access. Luminite is proud to be officially recognized as a rail industry supplier."
