

Press Release

## **ASSA ABLOY extends Aperio® RFID support with LEGIC®**

**London, September 2014 – ASSA ABLOY is adding yet more contactless RFID technologies to Aperio® wireless lock range. Online escutcheons from ASSA ABLOY's wireless access control range will now offer compatibility with the LEGIC® technology platform.**

Among high-frequency RFID technologies, Aperio® battery-powered locks with smart card readers already support iCLASS® by HID, MIFARE™ and MIFARE DESFire™. Compatible low-frequency RFID technologies already include HID Prox/EM410 (125 kHz).

Online Aperio® escutcheons now also support LEGIC® 13.56 MHz RFID technologies (Advant, Prime, ISO/IEC 14443 UID, ISO/IEC 15693 UID).

Aperio® cylinder support for LEGIC® RFID technology is due to be added soon. Other security devices from ASSA ABLOY's fast-growing Aperio® wireless access control range will follow.

About Aperio®: Available on the global market place, ASSA ABLOY's Aperio® technology enables a wide range of access control providers to cost-effectively integrate non-wired doors with mechanical locks into access control systems.

About LEGIC®: The LEGIC® technology platform includes transponder and reader chips as well as software and services for easy management of rights and applications. The open technology platform supports all common smart card standards and enables solutions tailored to individual needs using identification media such as RFID tags, contactless chip cards or NFC smartphones. The unique flexibility of the LEGIC® technology platform allows the combination of various applications on one identification medium.
