STI-7520

AVAILABLE WITH AIRCON AND/OR HEATER FACILITY (selected models)

KEY FEATURES

General Information

· Polycarbonate enclosures help protect against vandalism and accidental damage.
· Three year guarantee against breakage of polycarbonate in normal use (one year on electromechanical and electronic components).

Design

· Protects control panels located in areas where the environment conditions are extreme.

Construction

· Tough polycarbonate housing can withstand the severest of knocks.

Installation

· External mounting tabs allow the enclosure to be easily installed on to any wall surface.
· Supplied with backplate.
· Polycarbonate tested -40°C (-40°F) to 49°C (120°F).

Options

· Available with or without a 95 dB alarm, powered by a 9V PP3 battery.
· Includes thumb lock or key lock.
· Can be supplied with optional alarm.

PRODUCT OVERVIEW

Polycarbonate Enclosures help protect against vandalism and accidental damage. This range of multipurpose transparent polycarbonate enclosures is designed for the protection of fire and security control panels and other electronic equipment. Combining a tough rugged construction with stylish design, the series offers excellent protection for a wide range of equipment. The enclosures protect against vandalism, accidental damage and the environment whilst ensuring all round visibility and immediate access.

HOW IT WORKS

External mounting tabs allow the enclosures to be easily installed on to any wall surface, providing protection without the need to change the location of the equipment. They come complete with mounting accessories and tamperproof screws. For additional security and to deter misuse and theft, the enclosures can be fitted with a security alarm or sounder/strobe device.
