

CSL Routers for CCTV

Market Leaders

CSL was founded in the UK in 1996 and today, the CSL Group are trusted to deliver robust, reliable and secure communications for nearly half a million premises throughout Europe including many major brands.

Our solutions, platform and partnerships allow us to provide complete end-to-end connectivity solutions for Security, Fire, Health and many other critical M2M/IoT applications.

CSL Router

Our Routers offer a new rapid deployment opportunity for CCTV. They are ideal for both permanent or semi-permanent installations where instant connectivity is essential. They provide Installers and their end-users with an easy to use solution when broadband is unavailable, to ensure security is not compromised.

Data Made Simple

The CSL Routers are supplied with the appropriate SIM for their usage and there is a range of connectivity options available for any CCTV system. Installers can choose a package depending on the contract length and data usage required.

Immediate Connectivity

The installer simply orders the pre-configured Router through our M2M Connect portal to gain instant Mobile Broadband access for a CCTV system via the CSL SIM. Users can remotely access and view images on their CCTV DVR/NVR via an App.

In instances where broadband is already available the addition of the CSL Router with the End Point configuration can upgrade any existing broadband service to an Instant Private Network.

IMMEDIATE CONNECTIVITY FOR ANY CCTV INSTALLATION REQUIREMENTS

Benefits and Features

- No over usage charges
