

## Amaryllo Wins 2018 Trailblazer Award in IoT Asia

March 30<sup>th</sup>, 2018

**Amaryllo** participated in the 2018 IoT Asia hosted in Singapore and won the Trailblazer Award for offering innovative AI as a service business model to global partners. The prestigious recognition was awarded by Singapore's Minister for Foreign Affairs and Minister-in-Charge of Smart Nation. Press release was issued by Taiwan National Development Council shortly validating Amaryllo's competitive edge as a Taiwanese startup in the international market. The notable achievement of Amaryllo includes receiving CES BEST Innovation Awards for four consecutive years starting from 2015 to 2018. In addition, Amaryllo is also the proud recipient of Computex Best Choice Award.

Founded in the Netherlands, Amaryllo pioneers in the AI as a Service to offer robotic security and data mining solutions to B2C/B2B market. Amaryllo has become the first corporation to provide comprehensive security and AI service platform by integrating AI technologies such as the world's most secure 256-bit encrypted P2P network, patented robotic cameras, and flexible cloud storage service. Furthermore, Amaryllo is the first security corporation to mainstream Google WebRTC technology and is also the first to deploy 256-bit encrypted P2P network that is certified by Microsoft Skype. Amaryllo's patented standalone robotic cameras can auto-track moving object without remote computer, recognize human faces within 1 second, detect humans, cars, animals, and etc., trigger 6 different languages of voice greeting and support real-time two-way talk. Unlike conventional CCTV which is only simple recording devices, Amaryllo's robotic cameras can automatically identify and scare intruders away, eliminate 99% of the typical false alarm, optimize the instant alarm, reduce the cost and protect your properties and data security.

Amaryllo utilizes its AI technology and further developed the state of the art "Soteria" software not only offers security but also enables the camera robots to collect retail analytic data helping business owners to efficiently address targeted customers with actionable data. Such service can already be purchased in Costco Asia.

Amaryllo is seeking for worldwide partner to promote its AI services and will demonstrate its award-winning smart retailer service at booth C505 in IFSEC 2018 from June 19 to June 21, 2018.
