REVIEW

Accelerate Investigations

CASE MANAGEMENT: Organize all video assets of an investigation in a single container, bookmark objects of interest, and summarize case findings (including all relevant exhibits) in an exportable report, while dynamically collaborating on cases with other users.

VIDEO SYNOPSIS: Simultaneously present objects that have appeared at different times within the video. The result is a dramatically shorter video segment that fully preserves the viewer's ability to analyze the scene, enabling the review of hours of video in minutes and sometimes seconds.

MULTI-CAMERA SEARCH: Advanced multi-camera search powerfully identifies men, women, children and vehicles of interest with speed and precision, using face recognition, appearance similarity, apparel, color, size, speed, path, direction, dwell time and illumination change filters.

FACE RECOGNITION: Accurate face recognition rapidly pinpoints people of interest using digital images extracted from the video or from external sources.

APPEARANCE SIMILARITY: Instantly locate people, vehicles, and other items of interest by searching for objects with similar attributes.

VISUAL LAYERS: Create visual analytics for activity, dwell time, common paths and background changes.

FILTER TOLERANCE: Adjust tolerance levels to refine search results for class, attributes, color, dwell time, direction, area, path, face recognition and appearance similarity.

DENSITY & SPEED CONTROL: Increase or decrease the number and speed of events shown at once.

SORT CONTROL: View events by relevance or by order of occurrence and easily zoom in on items of interest.

RESEARCH

Derive Operational and Business Intelligence

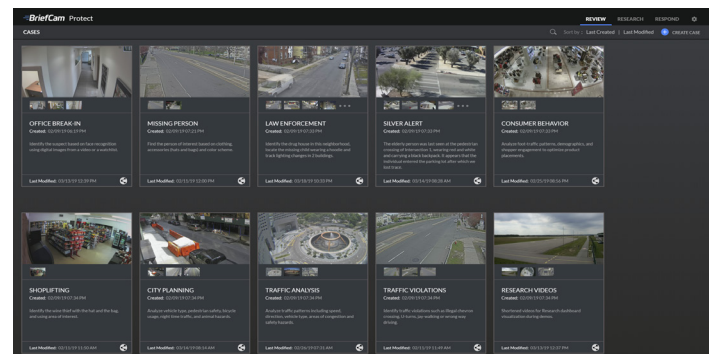

OPERATIONAL INTELLIGENCE PLATFORM: Interactive, intuitive and easy to use dashboards for visualizing and analyzing data. Chart suggestions & insight advisor auto-generate and prioritize relevant data points and charts.

HIGHLY CUSTOMIZABLE: Out-of-the-box, extensible library of vertical-specific dashboards to visually represent object movement, demographic segmentations, behavior trending, hotspots and object interactions.

THIRD PARTY DATA SOURCES: Seamlessly correlate video analytics with third party data sources, such as Point of Sale, Time Management, and Access Control, for a uniquely informative view of your environment.

FLEXIBLE SCHEDULING: Schedule continuous or one-time dashboard generation for any VMS video source.

VISUAL LAYERS: Derive insights with visual layer trend analytics within research dashboards.
