

“From the mythical home of the Alfa Romeo, was born the biggest mall in Italy. Il Centro, Arese”

Chi aspettar suole, ha ciò che vuole

It all began 20 years ago with the acquisition of an articulated building which is situated in an area full of entrepreneurial history, the historical Alfa Romeo, from where some of the most beautiful cars in the history of motoring have been created.

The inspiration came from architect De Lucchi whose design created an iconic, exclusive and incomparable structure.

With 120,000 square meters in total the largest shopping center in Italy and third in Europe, a project which comes to life because of the strategic long-term vision of Mark Brunelli, owner of Finiper Group.

“He that can have patience can have what he will”

Don't have too many irons in the fire

Smoke and Fire Curtains in conjunction with our local partners in Italy were asked to design and install fire curtains to be discrete yet provide protection to the buildings and within the requirements of European standards.

A large number of fire and smoke barriers have been installed in various retail units throughout the Centre to prevent the spread of fire and smoke penetrating into the mall, ensuring that we complete the smoke compartmentation strategy and of course being compliance to the testing parameters of EN1634-1: 2014 and its associated European classifications under EN13501-2.
