

Alarms Courses

Increasingly, owners of commercial, industrial and domestic property are seeking sophisticated alarm systems to protect against intruders and fire.

Worldwide, the demand for alarm systems of every type grows on a daily basis and so do the opportunities to design, install, maintain and repair, operate and manage this ever growing range of equipment.

Whether you want to become a fully trained, industry approved installation and repair engineer, an effective receiving station operator, a security manager, sales person, systems designer or planner, Tavcom has a course for you.

An exciting future is waiting!
