

WCCTV HD Time Lapse Video

Whether your construction or demolition sites require security, time lapse video production, fire prevention, onsite communications, remote access to project manage a site or review health and safety, or the complete package, WCCTV can supply you with a solution on a sale or rental basis.

WCCTV HD Time Lapse Video

WCCTV can provide High Definition Time Lapse Video production of your site builds or demolition projects, either as a standalone service or as an addition to our complete site security services.

WCCTV will create the project based around your specifications - let us know the length of project, key elements and we will take the time to learn about your objectives to ensure you have a time lapse video that captures your project perfectly. If you're not sure what you're looking for, speak to our time lapse team and we will advise you on how to make the most of your video.

The Time Lapse Camera can be installed as part of a WCCTV Site Tower if you are utilising WCCTV's site security services, or be provided as a completely standalone unit. The Time Lapse kit is comprised of a high spec 5MP camera, local recording and remote transmission so that the camera can be accessed at any time for live updates or even streamed via your websites and blogs.

WCCTV will provide you with a DVD and/or web upload of your completed project for use at presentations, board meetings or building openings as well as on your websites, blogs and social media.

WCCTV have provided time lapse video projects for BAM Construction, Northern Gas Networks, MWH, Tolent, KDC and more.

A selection of our previous projects can be found below.

BAM Construction – Hiscox Insurance HQ Build

Tolent Construction – WCCTV Global HQ Build

Network Rail - Blackrod Track Renewal

Features & Benefits

- High Definition quality Time Lapse Video up to 1080p
