

Conventional PTZ controls

IDIS Smart UX Controls v2.0

# Groundbreaking Agility, Ease, and Accuracy with IDIS Smart UX Controls v2.0

To combat the challenges of IP PTZ controls, IDIS has developed the game changing Smart UX Controls software to provide unparalleled accuracy and ease of use featuring intuitive “Slingshot” and “Rubberband” style controls, creating an experience unlike any other available on the market. These smooth and seamless controls allow users to easily follow moving objects in real-time with ground breaking accuracy by panning images at different speeds and in different directions literally without lifting a finger.

## Quick Controls

IDIS has also gone one step further to lessen the pain points associated with traditional PTZ controls and introduced “Quick Controls” functions to allow for simple and fast operation utilising a CTRL button and mouse combination (left / right / wheel click).

IDIS “Quick Controls” consist of “Quick Save”, “Quick Find”, “Quick Dewarping”, “Quick Zoom” and “Quick PTZ”. These revolutionary controls allow operators to dewarp any point of interest and even pan-tilt-zoom in a dewarping state.

- The “Quick PTZ” features up to 16x digital zoom, no matter the type of camera, while “Quick Find” enables users to drag a saved image to a desired camera channel and view recorded video from the time of saving, quickly and with little effort.
- “Quick Dewarping” allows operators to use the CTRL button with a combination of left, right and wheel mouse clicks to enable ePTZ, image reset and zoom in and out functionality to significantly speed up and simplify operation.

Quick Dewarping

Quick PTZ

Quick Zoom

Quick Save

Quick Find

These features combined with the ‘Rubberband’ and ‘Slingshot’ controls of IDIS Smart UX Controls enables pinpoint accuracy, even at great distances, delivering a critical advantage in any given security environment.

# Conventional PTZ Control

## Pan & Tilt

## Zoom-in & Zoom-out

# Slingshot / Rubberband Controls

## Slingshot Control

Aim and click any part of the image to quickly view a specific object, person, or area.

## Rubberband Control

Simply draw a rubber band anywhere for easy and smooth PTZ control.

**Slingshot Control**  
Aim and click any part of the image to quickly view a specific object, person, or area.
