

A real-time monitoring system

# MyLoneWorkers

A cloud based system designed to help companies monitor Lone Workers and manage tasks more efficiently

A pioneering Lone Worker System combining a mobile and web app for remote access and monitoring

## Features

### Geolocation

Accurate Lone Workers position through GPS, Wi-Fi or GSM network in real-time.

### Incident Reporting

Send an incident in real-time attaching multimedia files (image, audio) and adding signature.

### Man Down Alerts

Ensure Workers physical protection by sending auto alerts in case of a Man Down.

### Push to Talk

Secure group communication via a push to talk app, reducing cost of communication.
