

Domotics for Simplicity

NEW KULT SMART THERMOSTAT

APP & SMART HOME INTEGRATION

The built-in Wi-Fi connectivity lets you keep your home at a comfortable temperature and humidity (RH) with little to no input needed! KBLUE Webapp also offers Smart-Home features, communicating with other smart devices to create scenes and trigger the opening or closing of shades, lights.

TECHNOLOGY & DESIGN

Large touchscreen display and attractive user interface with high degree of scheduling flexibility thanks to KBLUE mobile APP.

Kult luxurious design and touchscreen interface have a modern feel, adding smart features to your existing heating and cooling systems in a stylish way.

ADD-ON FEATURES

Low Voltage and 230V compatibility, along with smart relays and analogue 0-10V output options make it possible to improve performances, flexibility and extend the use of the new Kult Smart Thermostat with existing heating + cooling systems, heat pumps, HVAC professional systems, hydronic and electric underfloor heating, multi-zone AC systems, etc.
