

Drive with Reflex

Drive with Reflex is a groundbreaking product that brings telematics data to life, supporting you with live data monitoring and immediate incident support.

Live data monitoring

Drive with Reflex provides live monitoring of data from telematics and dashcams from the Reflex Flexi-Family of products, maximising its potential to reduce costs, improve safety and identify efficiencies.

Data is filtered through state-of-the-art analysis tools to deliver insight about driving performance, tackling important issues such as speeding or evidence of driver distraction, including late, heavy braking.

Drive with Reflex benefits include:

- > Live data monitoring suite
- > Reporting mobile app
- > Risk management support
- > Proactive training
- > Immediate incident support
- > Driver briefings

Immediate incident support

The team can respond to collision alerts instantly, ensuring the welfare of the driver, notifying the emergency services and helping to manage the incident to minimise the likelihood of inflated third-party claims at a later date.

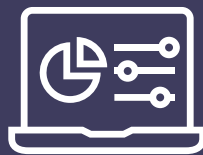

Driver briefings

When alerts are triggered, for example by harsh braking, independent experts at Drive with Reflex are on hand to discuss the incident with drivers. To report incidents and record damage, but also to offer impartial advice to lead behavioural change.

Contact us today to see how easily and efficiently your business can benefit.
