

Our Flexitrack telematics system is designed to maximise your profitability through greater productivity, increased driver efficiency and improved safety without any contracts or installation fees.

Control and insight

Track the exact location and status of your drivers and vehicles at any given time, allowing you to plan ahead and analyse the logistics of your fleet operation.

Telematics data can be transmitted live or through regular notifications to a wide range of ancillary devices. It has a wealth of potential uses such as:

- > Logistics planning
- > Driver training
- > Location and speed information
- > Driver scoring
- > Geo-fencing alerts (congestion charging zone)
- > Fuel efficiency
- > Vehicle and driver safety

Future-proof your business

In response to future government regulations, more and more companies are introducing electric vehicles to their fleet. In turn, telematics continues to become an integral part of daily operations. Fleet managers can now optimise driver and vehicle efficiency – all with the aid of Flexitrack telematics.

Contact us today to see how easily and efficiently your business can benefit.
