

SOFTNET 3D MANAGER

Hypervisor 2D/3D

In order to ensure the security of your areas of interest, Argos Technologies provides you with customized solutions to effectively prevent crime and protect property and people. Our innovative SoftNet Manager offers high-level video surveillance solutions with different features: perimeter detection, virtual barriers crossing, reading license plates reading, ...

Our customized solutions are fully customizable to meet your needs, whether for a small company or a multi-site park with thousands of cameras.

Video surveillance provides you an optimum security and accelerates the elucidation of crimes in the judicial business framework thanks to high quality recorded images. You prevent risks in the vicinity of buildings and public facilities, sports, cultural and industrial facilities, banks, shops, hospitals, ...

A reliable and secure system

You access to the platform with secured connections. You benefit from technical assistance with our technical experts in case of any breakdowns or problems. We assure you a one year warranty carry-on for all the Argos products range.

A global solution

Our solutions offer a wide range of products: hypervisors, cameras, accessories, video analytics, cloud storage, nomad video recorder. They provide high quality images and are powerful management tools. Tailored to your needs in analog and IP, they ensure optimum safety for your interest areas.

Innovation, evolution and development

The Argos Technologies belonging to ESI Group guarantees an optimized and highly scalable product integration while ensuring constant innovation and future developments.

Choose quality equipment fully integrated with your existing infrastructure

Our software suites made in France certify you an optimum quality. Our devices ensure a high quality HD images with 360 degrees cameras. We will find an appropriate response in order to suit to your needs. Our multiprotocol solutions are open and integrated into your environment and we offer you the possibility to upgrade your system.

Don't miss any detail and identify criminals

Monitor and investigate your areas of interest while maintaining direct flow of your cameras. View all incidents that may occur in real time to take decisions quickly. Zoom into the face of criminals in order to identify them in live or a posteriori. Communicate the images to the security forces with our optimized search functionality.

Reduce your costs and monitor all your areas in one center

Our open solutions enable you to avoid having to change all your existing systems. We integrate your IP and analog systems. Personalize your system easily for your geographically remote sites. Monitor and manage your different areas in one center in order to reduce your infrastructure costs. Reduce repair costs due to criminal deliberate damage.
