ABOUT STI

It all started with a solution to a challenge

Who We Are

Family owned and operated for over 40 years, we take great pride in our products and exemplary service. Our entire team works just as hard to make you a satisfied customer as we do to make the world a safer place, one product at a time.

What We Do

STI manufactures; protective polycarbonate covers, enclosures, call points, push buttons, heavy-duty cages and wireless alarms to help prevent theft and vandalism to important fire and safety devices. Covers and cages protect; smoke detectors, lights, manual call points, and much more. Alarms protect; fire extinguishers, exit doors, etc. Many variations of products are available to protect the things that protect you.

Where We Came From

The STI story begins four decades ago with a challenge made by a suburban Detroit school administrator who wanted to stop false fire alarms. Our Founder, Jack Taylor, used his expertise in security systems to invent the original Stopper® pull station protector. Today, STI has hundreds of innovative products that help make homes, businesses and workplaces around the world safe, smart and secure.
