Because everyone deserves peace of mind

Who are TDSi?

Located in the UK with its headquarters in Poole, Dorset, TDSi is a British manufacturer of integrated access control solutions, protecting millions of people worldwide each and every day.

Since the formation of TDSi in 1982 we have successfully supplied systems to over 100,000 installations across the world, with several million card holders benefitting from TDSi access control systems.

TDSi products are at the heart of security systems across the world. For more than a quarter of a century our high quality range of cost effective access control solutions has been developed to meet the needs of projects across a range of markets, both in the private and public sectors. From stand alone door-controllers to fully integrated access control software management suites, each of our products delivers the same combination of reliable performance, technical excellence, elegant design and value for money.

Worldwide Reach

As well as an office in France, we are proud to have partners worldwide who are TDSi approved and have been trained to the highest standard.

Partners worldwide help TDSi's worldwide reach and ensure that people worldwide are being protected by TDSi's high quality integrated security solutions.

What is Access Control?

Perhaps the obvious definition of access control is putting various measures in place to allow only those personnel (and the vehicles which they may drive), whether that be staff or authorised visitors entry into areas that allow them to go about their legitimate business. In addition we can choose when they are allowed into those areas.

The reasons for implementing access control can be far-reaching. But overall it is about reducing a risk to a level, which is deemed to be acceptable to us.

What are your options?

So how is access control achieved? It could be through the use of people the sentry or guard checking that only those personnel authorised entry are allowed past a check-point. Or by traditional lock and key and more recently through the use of electronic access control. But maybe more commonly these days a mixture of all three.

What are the key benefits of Electronic Access Control?

- **Tracking personnel on the site**
Unauthorised visitors, Authorised visitors, Employees
- **Awareness of these risks when they arise**
Ability to act quickly if a security threat is found
- **Copying the 'key' is much more difficult**
In the case of biometric data, practically impossible
- **Easy and quick to make a stolen key of no use**
Access rights can be applied across the site quickly
- **Additional features of an electronic system further enhance security**
Alarm generation, Time rules, Audit trails
- **Increased productivity and customer service**
Access Control provides a safe but monitored working environment
- **Integration capabilities create a centrally administered database**
Intruder alarms, fire alarms, cashless vending, library cards

why TDSi?

Innovative Products

TDSi's products are developed and designed in the UK by our specialist product development team. Our extensive product portfolio has been designed to meet all requirements and incorporates a wide range of technologies. Customers needs are at the forefront of our design process and we create products which ensure maximum safety, efficiency and ease of use.

TDSi Approved Installers

We offer all of our installers access to our Gateway training which has been carefully designed to ensure our Authorised, Gold and Platinum partners are equipped with the knowledge and expertise they need to efficiently install, maintain and upgrade TDSi products. We aim to give engineers the confidence to proactively manage their own installations.

UK Specialist Support

Our internal technical support and sales teams are trained to the highest standard and are based at our UK office in Poole. Our teams are on hand to support you with technical queries and refer you to an installer in your area as well as recommend TDSi products that are specific to your requirements and project.

Solutions for all Sectors

We have built extensive project experience across a wide range of business sectors, in both the private and public sectors. Working across the education, healthcare, leisure, transportation, industrial, commercial, government, utilities and banking and finance sectors, we have the products and experience to deliver systems for all applications in all areas of the world.

Software

Exgarde is our free of charge software that is a fully featured access control management PC software application that combines TDSi products into a single package with a user friendly interface.

TDSi's access control systems are designed to help control and manage authorised access into secure areas. Our PC software applications can be integrated, some programs can be re-configured to your own requirements.

Products

- EXgarde – Express, Pro, Enterprise
- VUgarde – VMS

CCTV

VUgarde is TDSi's wide range of CCTV surveillance products that enables complete IP surveillance from entry level systems through to fully integrated high end solutions.

The VUgarde brand includes: powerful yet straightforward VMS software, an Automatic Number Plate Recognition (ANPR) application, VUgarde Anywhere web server to view live and recorded images on any smart device, a wide range of IP cameras, server and client hardware.

Products

- Vugarde – VMS, Anywhere, ANPR

Controllers

Our range of access control units have been developed to provide the widest choice for the system specifier, installer, facilities manager and user with each controller delivering a range of features and benefits with ease of installation, commissioning and operation of prime importance. Flexible, scalable and interchangeable, our controllers can be tailored to meet the precise needs of each individual application.

Products

- SOLOgarde
- MICROgarde
- Excel
- Expert

Accessories

Our comprehensive range of access control system accessories includes a choice of high quality locking products and ancillary items to provide a full 'one stop shop' to meet the vast majority of access control needs.

We provide a wide range of access control systems accessories to cater for all installation needs.

Products

- Shear locks
- Electric Strikes
- Magnets
- Exit buttons
- Power supplies
- and more...

Readers

Our range of high quality access control readers and keypads deliver maximum choice to meet all project requirements. With a range of technologies, including biometric, MIFARE, proximity and infrared, systems may be chosen to exactly match the key design, operational, performance and budgetary objectives.

Products

- EXprox
- EXsmart
- DIGIgarde PLUS
- Long Range
- Energy Saving

Cards and Fobs

Our range of cards and fobs incorporates technologies to meet all organisational requirements from proximity cards to smart cards with or without a magnetic strip.

We supply high quality and genuine cards and custom printing option is available..

Products

- Proximity Cards/Fobs
- MIFARE Cards/Fobs
- Long range Keyfobs
