

# ARCHITECTUS-PRO

Tailored styling and technology

 **Comelit**<sup>®</sup>  
Passion. Technology. Design.

ARCHITECTUS-PRO is the made-to-measure door entry monitor system from Comelit. Designed to meet all customer requirements, the system is characterised by a modular structure that allows maximum personalisation of the external unit.

With a minimalist and attractive style which harmonises with modern architecture, it combines beauty of form with cutting edge technology.

Elegant lines in 3mm thick AISI 316 stainless steel with a satin finish.

An external unit which is completely free of mechanical keys, thanks to CapSense™ technology, which detects the barely perceptible impression made by a fingertip on the surface of the steel.

## ARCHITECTUS-PRO: the made-to- measure system.

ARCHITECTUS-PRO meets all the aesthetic and technological needs of the customer:

- Audio or audio/video systems
- Simplebus Top 2-wire door entry monitor system or VIP technology
- Unlimited users
- The nameplate can be personalised by engraving directly into the steel
- Informative text (such as a company name, residential address, etc.) can be engraved directly into the steel)
- Mail box
- Access control by electronic keys

- Alex Royal
- Josie P.
- Luigi Rossi
- Luc Bellard

- Joseph A.
- José Blanco
- Marta Ferrari
- Luise Bright

## THE MODULAR SYSTEM

ARCHITECTUS-PRO, unique among its kind, gives you the possibility to create anything from the simplest to the most comprehensively equipped external units.

The modular design means a range of different modules can be installed on the basic stainless steel frame. The modules with standard dimensions are fixed using magnetic contacts, while those modules with customised dimensions (mail boxes or information modules) are fixed directly to the frame.

The customer also has a choice of different mounting options: floor mounted on posts, mounted directly to a wall or flush mounted in a recess.

### STANDARD SQUARE MODULES 184MM X 184MM

### STANDARD RECTANGULAR MODULES 184MM X 370MM

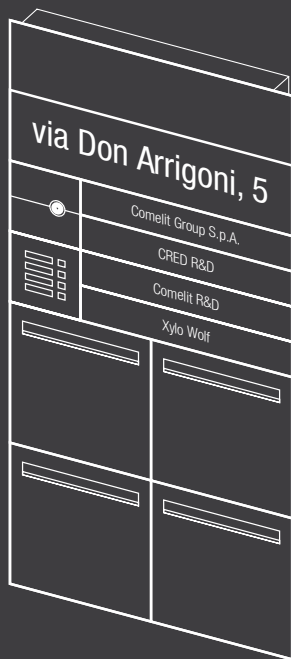

### MAIL BOX 370MM X 370MM

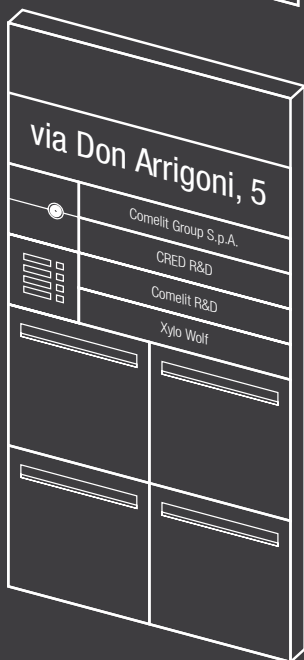

### INFORMATION MODULES WITH VARIABLE DIMENSIONS

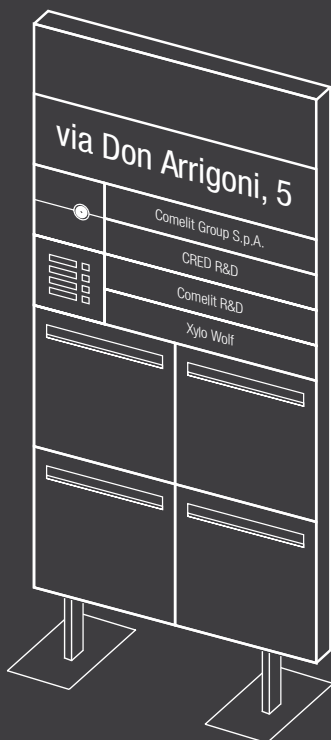

- FLUSH-MOUNTED FRAME**
- 1 AUDIO / VIDEO MODULE
  - 1 4-BUTTON CALL MODULE
  - 5 INFORMATION MODULES
  - 4 MAIL BOXES

- WALL-MOUNTED FRAME**
- 1 AUDIO / VIDEO MODULE
  - 1 4-BUTTON CALL MODULE
  - 5 INFORMATION MODULES
  - 4 MAIL BOXES

- FLOOR MOUNTED FRAME**
- 1 AUDIO / VIDEO MODULE
  - 1 4-BUTTON CALL MODULE
  - 5 INFORMATION MODULES
  - 4 MAIL BOXES

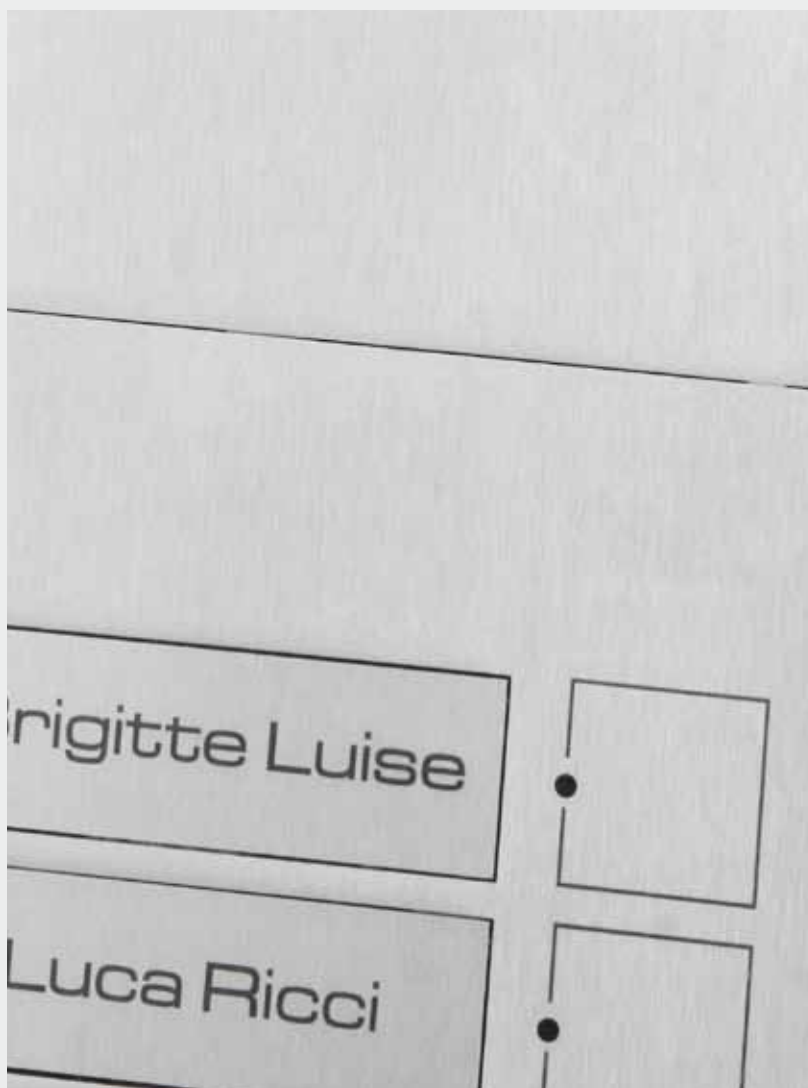

# Architectus Pro

## THE CUSTOMISABLE SYSTEM

ARCHITECTUS-PRO gives the customer the possibility to customise not just the structure of the external unit but also the information provided on it.

By engraving directly into the steel, you can customise:

- nameplate modules (user names, office names, etc.). The nameplates can be applied individually and replaced from the front when the external unit has already been installed.
- information modules (company name, address, internet site, building name, etc.)

## HOW TO ORDER

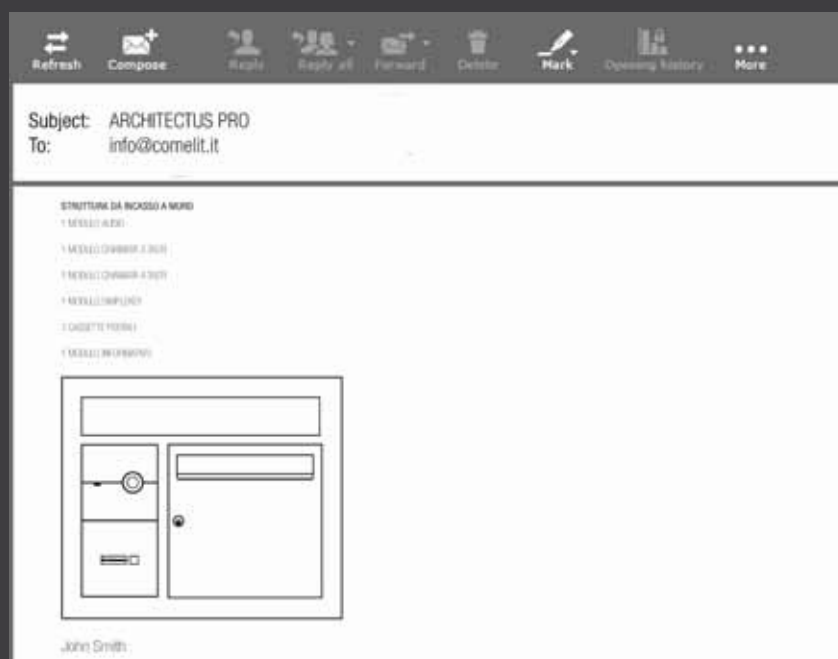

The ARCHITECTUS-PRO system is made to order.

To request a quote, write to [info@comelit.it](mailto:info@comelit.it) and provide the following information:

- Type of mounting (wall, flush, floor)
- Dimensions of the frame (height, width, depth)
- Type of installation (2-wire, ViP)
- Type of system (audio, audio/Video)
- Number of users and/or mail boxes
- Type of call (button, touch or sense digital directory)
- User names per nameplate (for button modules only)
- Any information modules required (for each module specify the dimension)
- Any preferences for the arrangement of the modules within the frame
- Access control module
- Technical drawing (optional)

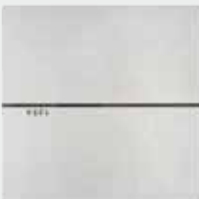

\* Comelit reserves the right to analyse the request and to notify the customer of any necessary changes regarding the technical and structural characteristics of the system.

### **SIMPLEBUS TOP**

A revolutionary invention from Comelit, this is the two-wire digital door-entry phone and door entry monitor system that connects the external unit to internal units up to 1,200 metres away via the same riser line, creating a communication network that can accommodate up to 16 monitors in parallel with the same address. These monitors are capable of operating independently and entering into dialogue with one another. The ideal solution for small houses, standalone apartment blocks and residential complexes with up to 120,000 users.

### **VIP SYSTEM**

Comelit's commitment to innovation in the video entry sector has found its ultimate expression in this system, which fully utilises the advantages of internet protocol and integrated digital communication. VIP System surpasses every limit: number of users, simultaneous conversations, distance... Its versatility, which allows it to use dedicated wiring or an existing LAN, makes it the benchmark system for large, new-build complexes or complexes undergoing renovation or system upgrading.
