Passion. Technology. Design.

Mini

Colour Mini. Reality framed by pure design.

This version adds colour to the practical functions of the basic model with a 16/9 colour screen. Practical and efficient, it offers brightness, contrast and ringtone volume adjustment, in addition to melody customisation. It has 4 touch-sensitive buttons for controlling the lock-release, self-ignition, auxiliary command (switchboard call) and privacy functions; it also manages floor door calls. 4 additional buttons can be added using art. 6733W

Simple lines. Ultra-thin.
16/9 screen. Four versions.
MINI: nothing more. Nothing less.

Black and white Mini. Simple and versatile.

Mini features a simple design without compromising on versatility. The white entry-level version is equipped with a 16/9 black and white screen offering brightness, contrast and ringtone volume adjustment, in addition to melody customisation. It has 4 touch-sensitive buttons for controlling the lock-release, self-ignition, auxiliary command (switchboard call) and privacy functions; it also manages floor door calls. 4 additional buttons can be added using art. 6733W.

Mini

Mini Deluxe.
“Full option” efficiency.
And a stylish soft-touch finish.

The elegance of black meets the convenience of the “full option” selection, to achieve the highest aesthetic standards. In addition to the Mini functions, this original version offers a handset with soft-touch finish and 8 buttons as standard. These buttons are used to manage the following: lock-release, self-ignition, auxiliary command (switchboard call), privacy option and a further four system functions. Includes door status indicator LED. Manages floor door calls as standard.

System

SIMPLEBUS TOP SYSTEM

A revolutionary invention from Comelit, this is the two-wire digital door-entry phone and door entry monitor system that connects the external unit to internal units up to 1,200 metres away via the same riser line, creating a communication network that can accommodate up to 16 monitors in parallel with the same address. These monitors are capable of operating independently and entering into dialogue with one another. The ideal solution for small houses, standalone apartment blocks and residential complexes up to 120,000 users.
