## Features

| | |
|---|---|
| Deploy on cloud, server or PC | Powerful and easy to use search facility |
| Manage camera settings | Intuitive video playback |
| Customisable user permissions and access levels | Restrict and assign metadata to files |
| Create unlimited users, user levels and departments | Create snapshots or smaller clips from footage without altering original file |
| Classify files with user-defined retention policies, categories and teams | Share files with internal users and external organisations |
| Integrated reporting functionality | Burn files to DVD and data discs |
| Full audit trail of every action performed | View footage from any device, including cell phones |
| Automatic video upload from cameras | Enterprise users can access footage using a number of popular browsers on a range of devices |

reveal

# 1. Connect Reveal body camera to DEMS

DEMS will automatically decrypt and upload footage and securely delete the files on the camera, ready for the next shift.

# 2. Search for footage

Search for specific files by filtering with keywords, date, retention policy, camera ID and user ID.

# 3. Review footage

Play, pause, rewind, fast-forward or scroll frame by frame.

# 4. Manage Data

Add notes, incident ID, mark as important, grab snapshots and create smaller clips from original footage.

# 5. Export files

Burn files to a DVD or data disc, share files with external organisations or export them to a computer.
